Instructions:

1. Create a graphical program named PayrollApp that provides fields where the user will enter in a name, id number, hourly pay and hours worked. When the user enters all the data and clicks the Calculate button the following output should be calculated and displayed:
   - Gross pay, which is hours worked times hourly pay
   - Federal withholding, which is 15% of the gross pay
   - State withholding, which is 5% of gross pay
   - Net pay, which is gross pay minus the federal and state withholding

2. Insert a comment at the top of the code which contains the name of the lab, the date the lab was written and the person who wrote the lab

3. Compress and archive the solution folder and submit it to the class web site
**Example Output:**

![Payroll Application](image-url)

**Grading:**

6 – General, comments, formatting, functionality, etc
2 – Form name and title
2 – Button name and text
2 – Prompt labels text
2 – Textboxes names
2 – Output labels names and configuration
6 – Code
