

Northwest State Community College would like to invite you to attend the second of three advisory committee meetings for our National Science Foundation (NSF) grant titled Cybersecurity for Advanced Manufacturing Organizations (CAMO). This meeting will be held both in person, and virtually, at 4:00 pm on October 19th. If you wish to attend the meeting in person, we will be meeting on NSCC's campus in room C211. You can also join virtually via Zoom by following this [link](#) or using the meeting ID 842 0950 8524 and the password 116447. We understand that your time is valuable and will attempt to keep the meeting length to an hour or less.

At our [first meeting](#), in June 2020, we examined a list of potential scenario topics and asked for your feedback. Since that meeting our team has created scenarios based on several of those topics. At this meeting we would like to gather your input on the completed scenarios, review the list of scenario topics still in development, and discuss our plans for disseminating the scenarios.

We would appreciate it if you could take a couple of minutes prior to the meeting and review the completed scenarios found at (<https://www.nl.northweststate.edu/CAMO>). If you have the time, we would like you try work through one or more of our scenarios using the material found on the previously listed website. When doing the lab portion of the scenario, you can sign on using the username **student24** and the password **CAMOPass**. If you have any questions or problems accessing anything, please contact Tony Hills at <thills@northweststate.edu>.

Please let Sarah Stubblefield sstubblefield@northweststate.edu know if you will or will not be attending. If you are unable to attend, please feel free to reach out to Tony Hills thills@northweststate.edu with any comments you might have.
